VOYAGER OCEAN SAILCLOTH CHOICE

High Modulus or AP - tightly woven, low stretch Dacron.

Marblehead - the most densely woven Dacron currently available.

Cruise Laminate - a durable laminate consisting of high modulus Polyester yarn and two layers of taffeta sandwiched between two layers of Polyester film.

DYS - the ultimate cruising laminate built with Dyneema yarns; very durable and stable.

VOYAGER

HYDESAILS

MAINSAIL

BATTEN TENSION ADJUSTMENT

sail shown is fully battened with Sailman 4000 batten cars with internal, mechanical batten tension adjustment.
